

ZeroVA AX80

19.2 kW Level 2 charger

Higher-powered commercial charger with a 5-inch LCD display. Ideal for fleets or public charger deployments.

ZeroVA is quickly becoming a leading EV charger provider in North America. The AX80 is best for deployments requiring more power than standard 7.7 kW chargers.

Combined Ethernet, Wi-Fi, and 4G in every unit provide numerous ways to keep this charger connected. The AX80 has hardware required to support ISO 15118 Plug & Charge with a future software update.

2-year manufacturer's warranty. Cable holster not included.
